Abstract. This document provides the LaTeX template for the Amsterdam Colloquium 2026. Included are a .tex file, a .sty file, a .bib file, two sample outputs of the compiled document (AC2026_Template_Sample_Linguex/Expex.pdf), and a .pdf file needed for the footer (illc_no_text_logo.pdf). In-line comments within the code editor of the source file, AC2026.tex, provide general guidelines for AC authors. This template adheres to the required formatting specifications and serves as an example of how your final manuscript should appear. Please use these instructions when preparing the final version of accepted papers. In particular, do not add page numbers, and make sure that you update the following commands with the appropriate values:

- \title{}
- \author{}
- \addbibresource{}
- \setheaderinfo{}{}

1 Introduction

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

2 Template Overview

2.1 References and Citations

We use the biblatex package for bibliography management. We've added a convenience command for possessive citations: use \posscite{} to cite in this way; for example, Einstein's (1905)

*A short thanks to Colleague1, Colleague2, and Colleague3.

or Einstein's (1905, p. 13). Additionally, you can use standard citation commands, such as `\textcite{}`, `\cite{}`, `\citeauthor{}`, `\citeyear{}`; for example, Dirac (1981) or Knuth.

Troubleshooting. If the bibliography isn't printed when you compile, it may be because you haven't installed biber but are using, e.g., bibtex (we use biber as the backend for biblatex due to better compatibility). Installing biber should solve the issue. More generally, if you encounter any problems with the template, you can also try compiling with an online editor like Overleaf, as outdated or missing packages may be the cause.

2.2 Footnotes

Footnotes can be added using `\footnote{}`, like this:[1]

2.3 Figures and Tables

Refer to Figure 1 for an example of how to include a figure.

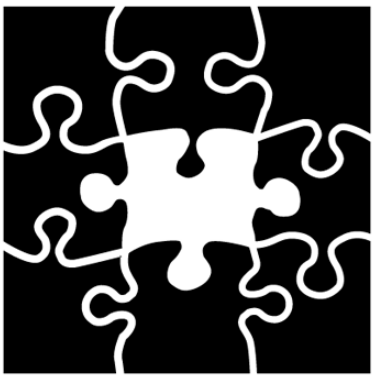

Figure 1: Here's an example of a caption for a figure.

2.4 Typesetting Examples and Glosses

Submissions must be typeset using `linguex`, `expex` or `gb4e` - see document preamble and file details. `Linguex` is preferred. However, the extra typographical power of `gb4e` or `expex` may be required for glossing needs. To keep the presentation of cross referenced examples uniform throughout the final proceedings we provide custom cross-referencing commands for `expex` and `gb4e` - `\gethyperref` and `\getfullhyperref` to ensure they match that of `linguex`.

Here's an example of the formatting using `expex`:

(1) a. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.
b. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

And here's an example of the gloss formatting using the `expex` option:

(2)

Lorem	ipsum	dolor	sit	amet	consectetuer	adipiscing	elit
x	x	x	x	x	x	x	x
Lorem	ipsum	dolor	sit	amet	consectetuer	adipiscing	elit

'Lorem ipsum dolor sit amet, consectetuer adipiscing elit.'

[1] Here's a sample footnote.

Heres an example of in text cross referencing: (1a) is a plain example, (1a) and (1b) are subexamples of (1). (2) is a glossed example. ([3]) and ([3.a]) are further examples:

(3) **Context**: Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

a. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Micro-Typographical Note for Expex Users If we take `linguex`, for example, the spacing between two concurrent examples is defined by `\Exredux`, whose default is `-\baselineskip`. `\Exredux` ensures that sequentially occurring examples are not separated by too much vertical space. In contrast, sequentially occurring numbered examples using the `expex \ex \xe` environment, such as ([4]) and ([5]), will generate more vertical space than typographical intuition suggests is desirable. Witness that:

```
\ex \lipsum[1][1] \xe

\ex \lipsum[1][1] \xe
```

Produces:

(4) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(5) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

To my eye, (4) and (5) have more vertical blank space than is appropriate for concurrent examples. If you are sympathetic to this judgment, then to combat this and in the name of saving virtual paper, one should modify all non-initial `\ex \xe` environments with ~ when `\ex` examples are displayed sequentially, with no intervening text. In practice, this means that instead of the amount of vertical space in (4) and (5), we get that of ([6]) and ([7]). In practice, this looks like this:

```
\ex \lipsum[1][1] \xe

\ex~ \lipsum[1][1] \xe
```

(6) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(7) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

In (6) and (7), to my eye, are more appropriately spaced Here, the inclusion of ~ ensures the proper amount of vertical space. Repeat this as many times as required, e.g ([8]) - ([11]):

```
\ex  \lipsum[1][1] \xe

\ex~  \lipsum[1][1] \xe

\ex~  \lipsum[1][1] \xe

\ex~  \lipsum[1][1] \xe
```

(8) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(9) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(10) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(11) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Likewise:

```
\pex \a \lipsum[1][1] \xe

\pex~ \a  \lipsum[1][1] \xe

\pex~ \a \lipsum[1][1] \xe

\pex~ \a  \lipsum[1][1] \xe
```

(12) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(13) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(14) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

(15) Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

2.5 Theorem Environment

Below is a sample of how the theorem environment looks.

Definition 2.1. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Definition 2.2 (Name of definition)**.** Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Theorem 2.3. *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*

Theorem 2.4 (Name of theorem)**.** *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*

Proof. Lorem ipsum dolor sit amet, consectetuer adipiscing elit. □

Proposition 2.5. *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*

Corollary 2.6. *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*

Lemma 2.7. *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*

Fact 2.8. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Remark 2.9. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

2.6 Appendices

To switch section numbering to letters for your appendices, use `\appendix` before starting the first appendix section. See Appendix A as an example.

3 Conclusion

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Acknowledgements. A longer thanks to Colleague1, Colleague2, Colleague3.

A Sample Appendix

Here's an example of an appendix entry.

A.1 Lorem Ipsum

Definition A.1. Lorem ipsum dolor sit amet, consectetuer adipiscing elit.

Theorem A.2. *Lorem ipsum dolor sit amet, consectetuer adipiscing elit.*
